

Use your new thermostat to maximize your savings on SmartCurrents™

Set up your ecobee3 lite thermostat

You can adjust your new thermostat's settings to fit your preferences.

- **Comfort Settings.** Your new thermostat allows you to select Comfort Settings for heating or cooling your home in three modes: **Home**, **Sleep**, and **Away**. Set a single preferred temperature for each mode for when you are home, when you are asleep, and when no one is home.
- **Schedules.** Your thermostat also lets you schedule the day and time each Comfort Setting mode starts to enhance comfort when you're home and maximize energy savings when you're away.

To program these settings on the thermostat, go to the **Main Menu** and select **Schedule** or **Comfort Settings**. You can also program these settings using the ecobee mobile app or web portal.

SmartCurrents

Follow these tips to save

Shift your energy use to Off-Peak hours when possible

As a SmartCurrents participant, you are signed up for our **Dynamic Peak Pricing rate**. You can save with this rate by shifting your energy use to lower-priced times of the day, including nights and weekends.

Mid-Peak

Weekdays 7 a.m. – 3 p.m.
Weekdays 7 p.m. – 11 p.m.

On-Peak

Weekdays 3 p.m. – 7 p.m.

Off-Peak

Weekdays 11 p.m. – 7 a.m.
Weekends and Holidays

Get maximum savings when you shift energy use to Off-Peak hours

Choose your thermostat settings carefully

Suggested Comfort Settings

	Away	🔥 64	❄️ 82
	Home	🔥 68	❄️ 78
	Sleep	🔥 67	❄️ 80

Consider capping your Comfort Settings

for cooling at 78 degrees in the summer and heating at 68 degrees in the winter. You can also adjust the temperature even more when you are sleeping or away.

M-F	Sat-Sun
 7:00 am	 9:00 am
 3:00 pm	
 7:00 pm	
 11:00 pm	 11:00 pm

Try setting up a schedule that reduces heating and cooling during On-Peak hours. You could even set your thermostat to Away during On-Peak times. For example, see the schedule at left.

Automatically save during Critical Peak Events

On certain days each year when the grid is strained, such as during a heat wave, SmartCurrents may call Critical Peak Events—brief periods that have higher energy costs. You'll always receive an alert by email, SMS, or phone call before an event. During Critical Peak Events, your ecobee3 lite will automatically adjust your temperature setting by 4 degrees to help you save on costs.

Tip: In the summer, cool your home before a Critical Peak Event to keep your household comfortable during the event without using more energy.
