

DTE CleanVision Natural Gas Balance program is certified by Green-e® Climate. As part of this certification, we are required to provide you with detailed information about the project, including this Project Information Disclosure and the program's Price, Terms and Conditions.

The greenhouse gas emissions being offset with Natural Gas Balance are those associated with the combustion of natural gas at the point of consumption. They do not include emissions that occur during the extraction, production, or delivery of natural gas, including methane leaks.

Our project information

One carbon offset represents one metric ton of carbon dioxide-equivalent emissions reductions. The verified GHG emissions reductions you purchased are sourced from projects that have been validated and registered under high-quality project standards.		
Project name: Bluesource – Greenleaf Improved Forest Management Project	Project type: Improved Forest Management	Project Location: United States
Start date: 4/11/2019	Project Certification: American Carbon Registry	Registry ID: ACR506

Natural Gas Balance is Green-e® Climate certified and meets the environmental and consumer-protection standards for greenhouse gas emissions reductions (carbon offsets) set forth by the nonprofit Center for Resource Solutions. Learn more at www.green-e.org.
