Attn: Large End Use Transportation Exploratory Offering Program
P.O. Box 11289
Detroit, MI 48211

Subject: DTE Energy’s gas Energy Efficiency Program “End Use Transportation (EUT) Exploratory Offering” request.

Please consider this letter a formal request of __________________________ (Company/Corporation) to participate in the DTE Energy’s Gas EUT Exploratory Offering of the Energy Efficiency program and thereby run our own energy efficiency program (self-direct). This request applies to all customers that take service under DTE Energy’s Commission approved EUT service rates LT, XLT, and XXLT or take transportation service pursuant to a special transportation contract approve by the Commission.

2018 Minimum Annual Savings = TOTAL x 0.75%    TOTAL USAGE =

By participating in the “EUT Exploratory Offering” these sites/accounts are no longer eligible to participate in the Energy Efficiency program offered by DTE Energy Gas or receive rebates for energy savings projects which may be installed. Accounts that received or plan to receive an energy efficiency incentive from DTE Energy in the current year must wait until January 1 of the next year to participate in this Exploratory Offering. If you would like to participate in the gas EUT Exploratory Offering, and you submit your application between September 15 and October 15, 2018, the reduced surcharge will reflect your selection to participate in this program starting on January 1, 2019.

I understand that my company is required to run its own energy efficiency program and will receive a lower energy efficiency (EE) surcharge. I also understand my company is required to submit an annual energy savings report due to DTE Energy by March 1 each year, reporting the prior year’s implemented energy savings attributable to my “self-direct” accounts in a format provided by DTE Energy gas. Reported savings will be recorded and the Michigan Public Service Commission reserves the option to review the report and may require the account (s) to involuntarily “opt-in” if any deficiencies are noted.

I understand there is a one-time voluntarily return or “opt-in” option. Customers that “opt-in” are required to pay the full EE surcharge retroactive to January 1 of the year in which they “opt-in”. “Opt-out” customers choosing to “opt-in” are no longer eligible to opt-out or until such time that
regulatory action might occur that could change circumstances. I understand this is an EUT Gas Exploratory offering subject to re-authorization by the Michigan Public Service Commission in DTE Energy’s next bi-annual review proceeding.

If any further information is required, please contact me at phone:_________________________
