# WHAT IS MIGREENPOWER?

MIGreenPower is a simple and affordable program that enables DTE Energy electric customers to reduce their carbon footprint by attributing more of their energy use to local wind and solar projects.

## THE PROGRAM IS:

### FLEXIBLE

You choose the percentage of your energy use you'd like to attribute to local wind and solar projects.

### AFFORDABLE

Our online calculator can help you estimate the change to your monthly bill and the environmental impact of your participation.

### EASY

You don't need to sign a contract and can change your participation level at any time.

### IMPACTFUL

When you enroll in the program, you're supporting the growth of renewable energy in Michigan and helping to protect the environment for future generations.
