

# Wind Development Process

**1.** Obtain land easements

**2.** Collect data (wind, weather, environmental)

**3.** Apply for electrical interconnection

**4.** Identify turbine locations

**5.** Secure permits

**6.** Construct access roads

**7.** Pour foundations

**8.** Deliver turbine components

**9.** Install turbines and other components

**10.** Complete substations and interconnections

**11.** Test turbines

**12.** Commission and operate wind park
