

Tax credits help DTE Energy keep bills down

100 percent of the DTE tax savings will be passed on to all customers!

Q: Why did I receive these credits?

A: DTE is passing all savings to our customers as a result of the Tax Cuts and Job Act which reduced the federal corporate tax rate from 35 to 21 percent.

Q: How much is being refunded?

A: 100 percent of the DTE tax savings will be passed to all DTE Energy customers. Annually these savings add up to more than \$300 million.

Q: Are there different tax credits?

- A: Yes, as determined by the Michigan Public Service Commission (MPSC) there are three types of credits in which our customers will see the more than \$300 million of savings.
- Tax Credit A implemented in 2018, reflects the new on-going tax rate which was dropped from 35 to 21 percent. This credit is based on usage. The savings have already been reflected in your current rate.
 - Tax Credit B is the refund of a portion of the old tax rate above the new 21 percent rate. It was collected during a 2018 timeframe, prior to Credit A's implementation. This credit was based on energy usage. For DTE Gas customers, this was for the excess taxes collected from January 2018 - June 2018. For DTE Electric customers, this was for the excess taxes collected from January 2018 - July 2018.
 - Tax Credit C includes remaining impacts of tax law change and addresses deferred taxes, depreciation and other impacts not captured by Credit A and Credit B.

Q: What are the savings on my energy bill?

A: The average DTE electric and/or gas customer pays around \$3 less annually thanks to these tax savings. For the average residential electric customer (using 650 kwh per month) this amounts to \$40 in savings a year. A residential gas customer will save approximately \$19 annually. Customers with both electric and gas service will save on both. Business customer savings will vary by usage.

Q: When were the tax savings implemented?

Tax Credit	DTE Gas Customers	DTE Electric Customers
Tax Credit A	Savings reflected in rate as of July 2018	Savings reflected in rate as of August 2018
Tax Credit B	Implemented January - June 2019	Implemented January - June 2019
Tax Credit C	Appears on bills beginning September 2019	Savings reflected in rate as of July 2019

Q: If I have an alternative gas supplier (AGS), do I still see savings?

A: Yes. These savings apply to all customers regardless of whether they have chosen to have their gas supplied by an AGS.

Q: If I am part of the Electric Choice program, do I still see savings?

A: Any tax savings from alternative electricity suppliers will be governed by the MPSC.

Q: Does my bill go up even though I get a tax credit?

A: The tax credits are only a portion of your bill. There are several other factors that impact the price you pay each month, including weather and monthly energy usage.
